Brochure design by Genevieve Kellam,
Dutchess BOCES Shared Printing Service
Printed on Ricoh C900 Production Color Copier
on Mohawk 32# gloss text paper
ABOUT US

The Dutchess BOCES Shared Printing Service (CoSer 536) is a cooperative service between Dutchess BOCES and participating component school districts. The Print Shop is a working shop (non-instructional) that serves thirteen districts in Dutchess County as well as cross-contracts with school districts outside Dutchess County. The labor portion of jobs printed by Dutchess BOCES qualifies for state aid. Stock papers used are purchased through cooperative paper bids, lowering costs to component school districts.

Established in 1988, the professional quality, prompt service and cost-effectiveness of the Dutchess BOCES Print Shop is our hallmark. We offer a full range of printing services, and are dedicated to meeting the needs of our clients. We can assist you through all phases of your printing needs from design to finished product.

Projects designed and produced by the Print Shop have been recognized by the NSPRA, the National School Public Relations Association, and NYSPRA, the New York State Public Relations Association.

The Dutchess BOCES Print Shop is located at:
900 Dutchess Turnpike, Poughkeepsie, N.Y., 12603.
845.486.4840 | M–F 8:00 - 4:00.

PRINT SHOP STAFF

The Shared Printing Service at Dutchess BOCES is a division of Communications and Grants Research, Genevieve Kellam, Administrator.

Robert Patterson
Kathleen Gibson-Ferris
Peter Perricci
Todd Leland
JOB SUBMISSION ➤

All requests for Print Shop printing are submitted using a Job Order Form (see sample on page 5) which is available at each school or administrative office. Please contact the Print Shop if you need forms. The Job Order Form has all the information required for the production of the job and must be approved by the designated personnel in your district. Work cannot begin on a job without official authorization from your district. Please use a separate Job Order Form for each printing request.

An authorized Job Order Form must be completed and sent to the Print Shop to process all orders.

If you are a Dutchess BOCES division, indicate the budget code on the Job Order Form in order for work can begin. Standard turnaround time is 10 working days or less, depending on the project. Rush jobs may easily be accommodated.

QUOTES ➤

An estimate is based on the following:
How much time will it take to produce the job, cost of the materials, color or B&W inks, and quantity.

Some questions to ask yourself: Will there be typesetting, graphic design and/or pre-press required, or is it a copy-ready job? Will you need us to scan originals, color-correct photos?

BILLING ➤

Jobs are calculated once completed. The white copy of the Job Order Form along with materials originally sent with the printing request is returned to the originator. This copy serves as your invoice.

All billing is handled through Dutchess BOCES business office.

DELIVERY ➤

Delivery of printed items is usually picked up by school district couriers. Special requests, such as UPS and FedEx, are available.

Special requirements, such as maximum number of pieces per box, special packaging, mail sorting or bundling, or maximum box weight can be accommodated.

INSTRUCTIONS FOR COMPLETING PRINT SHOP JOB ORDER FORM

- USE ONE JOB ORDER FORM PER PRINT JOB
- ALWAYS SEND A SAMPLE OF THE JOB (no staples) WITH THE JOB ORDER FORM
- FILL OUT AS MUCH INFORMATION AS POSSIBLE, OR CALL US FOR ASSISTANCE

ITEM
Give the job you send a name so it can be referred to with understanding between you and the Print Shop.

New Item*
Is it something we’ve never done before? If so, under “New Item” check the appropriate boxes. If you are providing digital files, tell us what type of files they are and how we are going to receive those files.

*Any job that has to be typeset or changed will be proofed and must be approved by you before it is printed. You will receive by fax, email or courier a copy of the proof and a Fax Proof Sheet that MUST BE SIGNED BEFORE WE PROCEED WITH THE JOB. YOU WILL NOT RECEIVE A PROOF unless it is a job we have typeset, has changes, or a proof is requested by you under the “Special Instructions” box.

Repeat Item
“Repeat - sample attached” means no changes. You will not get a proof; the job goes directly into production.

Have we printed it before but you want something changed? Then please check “Repeat with Changes” and show the changes on the sample in red ink. You will receive a proof, so please indicate your email address.

Quantity
What is the total quantity of pieces you want? Example: “1 box” is not a quantity.

Number of pages? Count each page (sides not sheets). Do you want it printed 1-sided, 2-sided or a combination of both? Also count pages designated to be blank. Does your count include inside and outside covers?

# of Lots
Different pieces with the same paper, quantity and binding can be included on a single Job Order Form. Each lot may have different numbers of pages from one another. Indicate the number of lots you have.

Size
Please give us both flat and finished measurements in inches. Example: you have a saddle-stitched booklet that measures 8 1/2” x 11” finished. This makes your flat size 11” x 17” because when your booklet is opened flat that’s the size of the sheet of paper.

Paper
Inside Pages of a booklet are generally (but not necessarily) a lighter text weight paper and Cover Pages are generally heavier stock. Text Stock is generally thought of as copier paper. Cover Stock would be like the thickness of an index card or business card. Specify a color for the paper(s) or it will be printed on white 20# bond paper.

Ink
Specify the color of ink you want printed if it’s a single color, or check color copy if it’s full color, and if you want it printed on 1 or 2 sides of the item. You must specify the ink color or it will be printed with black ink.

Carbonless
This is multipart NCR paper that we stock pre-collated as follows:

2 Part: White, Canary
3 Part: White, Canary, Pink
4 Part: White, Canary, Pink, Goldenrod
5 Part: White, Green, Canary, Pink, Goldenrod
Tag: If the last copy is index weight available in white or manila
Other: Call for custom combinations

Envelopes
Business envelopes are #10 regular or #10 window style and usually printed on 24# white wove paper. Anything else requires you to check “other” and give the envelope size on the designated line. We have many types of envelopes in stock.

Binding
Please choose a type of bind or your job will come to you unbound.

ULC & 2 Side Staples We can staple up to 100 sheets maximum including covers.
Saddle Stitch 2 Staples in fold of booklet. 16 (flat) sheet maximum including covers.
Tape Bind 2 Side Staples plus a cosmetic tape that covers the staples. 100 sheet maximum including covers.
Coil Plastic continuous coils that allow the book to lay flat and fold back on itself.
Unbound If your job is unbound, check if you want the sets collated or uncollated.

Finishing & Specialty
If you would like pads, indicate the number of sheets per pad you want. (50 or 100)
Hole Punch/Numbering/ These are specific to certain specialty jobs. Indicate the details on the Job Order Form.
/Fold/Posters/Banners/ If there is something you need, whether it’s a laminated badge, full color poster, or materials for a meeting, the Dutchess BOCES Print Shop is ready to help you get what you need!
Laminate/Pads/Perf/Score

Special Packaging
If you have a district-wide job that needs to be sent to each school building, indicate in this box which building gets what quantity and we’ll package and label accordingly.

Add’tl Instructions
If you need anything not given as a choice on the form, put those details here.

QUESTIONS? WE CAN HELP! 845.486.4840 x3008 Mon - Fri, 8:00 A.M. to 4:00 P.M.
BUILDING YOUR PRINT JOB ➤

The Print Shop provides services for planning, typesetting, and layout and design of your publications. We are here to do whatever is necessary to complete your job for the next phase of the printing process.

Selecting Quantities

For jobs used in large quantities that aren’t revised often, it is more cost effective to order a larger quantity. The cost per copy can be substantially less in large quantity order than for smaller orders.

COPYRIGHT ➤

It is the responsibility of the customer to obtain written permission from the copyright holder before we can print copyrighted material.

The person who submitted the printing request and Dutchess BOCES could be liable for damages if copyrighted materials are reproduced in violation of copyright law. To avoid delays in production, please acquire proper authorization in writing from the publisher.

SCHEDULING ➤

Standard lead-time for the BOCES Print Shop is ten working days from final proof approval. Please inform us if your print job is time-sensitive so appropriate production time is scheduled to accommodate your special event.

Many jobs require considerable time to produce if the job requires pre-press or post-production operations or if significant quantities are ordered. These circumstances should be taken into account when scheduling your due date. Contact the Print Shop for jobs required in less than 10 days.
We carry soy-based inks that are environmentally friendly. We stock a variety of Pantone® ink colors, can match inks to your specifications, or special order the ink you desire.

The Print Shop does not accept supplied stock or materials (envelopes, paper, etc.) from districts.

Below are some of the types of papers stocked in the Print Shop purchased by cooperative bids that may help you select the right paper for your printed piece economically. Non-stock papers are available by special order.

Text
20#, 50# papers available in white and assorted colors. Heavier text weights such as 70# and 80# are available via special order.

Cover
60#, 65#, 80# heavy stock that is used for book covers, cards, etc. We carry a wide variety of colors from white opaque to bright hues.

Opaque
Paper that is minimizes show-through of text and images from one side of the page to the other, useful for better quality booklets. We carry 70# white text weight opaque.

Index
Is used wherever a stiff, inexpensive paper is required and must accept writing inks easily. This paper is commonly used for student folders. Index is in stock on 90#, 110# 140# in various colors.
**Envelopes**
We carry a large supply of envelopes in most sizes to suit your needs.

Regular and Window Envelopes in standard and off-standard sizes such as security and catalog envelopes are in stock.

**Carbonless**
Is used for business forms that require multiple copies of one form. Pre-collated sets have standard color sequences from 2 part to 5 part. We can do custom collation, i.e., a multiple part form all in one color.

**Standard Colors for stock carbonless forms:**
- 2 part - white, canary
- 3 part - white, canary, pink
- 4 part - white, canary, pink, goldenrod
- 5 part - white, green, canary, pink, goldenrod

**COPY SUBMISSION GUIDELINES ➤**

For best results, follow the steps below for preparing desktop publishing files for submission to the Print Shop:

1. A digital copy of the desktop publishing source file.
2. A copy of the fonts used in the job.
3. Linked graphic or photo files used in the job.
4. Scan at the proper resolution for printing:
   - at least 300 dpi for photos and 1200 dpi for type and or line work.
5. Include a hard copy of your job with the order, this is important to insure reproduction is equal to expectations.

**We Accept...**
Adobe InDesign®, Illustrator®, PhotoShop®, Windows® PC or Macintosh® format, PDF’s, Microsoft Word®, USB flash disks, CD ROMs, or camera-ready copy. Please remember to package all source files to include graphics files and fonts so we can open your files.

We also accept Microsoft Publisher® files. It is important to note that Microsoft Publisher® is a word processing program that allows you to build simple publications to print on your laser printer. Because it does not have the graphic, layout and editing capabilities of printing industry-standard programs such as Adobe InDesign® or QuarkXPress®, using Publisher can cost more pre-press if your file is prepared improperly. In most cases it is best to convert your Publisher file to PDF and submit as print-ready or contact us with any questions.
File Preparation
All elements used in the creation of a document (artwork, scans, fonts and images) should be grouped with that document in a digital folder and submitted on a disk.

Camera-Ready Copy
The term “camera-ready” means that the mechanical or original you supply us is complete, with all elements in position and ready as is to go on press or production copiers without manipulation.

When submitting camera-ready copy for reproduction, please send clean originals. Do not send in copy on colored paper. A minimum of 3/8” margin is required on all sides. Typewritten originals should be clean and black (not blue) ink for superior reproduction.

Preparing Artwork
Graphics (line drawings) should be drawn in black ink (not pencil). When more than one color is to be used in printing, the artwork must be separated or broken down into color components. Please do not use tape on original drawings.

Photographs
Original photographs must be submitted properly labeled for identification. Do not place tape on the image side of photographs, graphics, or text.

Proofs
Any changes to a previous run or new items that the Print Shop designs will automatically generate a proof for your review in order to correct mistakes in format and typographical errors. Proofs may either be sent to you via fax or an emailed PDF. Both are accompanied by a Proof Sheet that directs Print Shop staff how to proceed.

By signing the Proof Sheet, the customer takes full responsibility for the content of the printed piece. Remember, these additional proofs may add cost and time delay to the finished piece.

The job enters production upon receipt of a signed proof.

The final responsibility for proof-reading rests with the client.
Fonts
All fonts must be included on your disk, including fonts used in any graphic files. Postscript fonts generally output better than TrueType fonts. Open Type fonts function in either Windows® or Macintosh® operating systems.

Color
If you are submitting a job that has two colors, make sure they are spot colors and not process colors. Contact us if you are not sure how the color in your document will print. Our presses are capable of printing one and two-color. Full color is printed on our production copier and is generally more costly than single color printed on press.

Please send color separations of each page for 2-color jobs as well as a color composite with spot colors specified on the Job Order Form and the sample. This gives us a comparison and supplies us with a visual reference.

Digital Photos
Scan your images or photos at 300 dpi. Scan them at the size you’ll use in your job so you’ll import them into your job at 100%. For black and white line art scan a minimum of 1200 dpi. Save your images in a CMYK mode for color (not RGB), grayscale mode for grayscale and bitmap mode for line art. Save the images in TIFF or EPS format. JPEGs must be converted.

Images to be printed need to be provided at a minimum of 300 dpi in order to achieve quality output.

Print Area
The print area, the space which the printer can apply ink or toner, is smaller that the actual size of the paper to allow for the margins.

Your page layout should always have (top, bottom, right, left) margins with a minimum of 3/8” to allow for gripper / imaging requirements.

PRE-PRODUCTION SERVICES ➤

Typesetting / Layout / Design
The Print Shop offers a full range of design services that include everything from a single project to a full campaign. Copy for typesetting should be submitted when possible in a word processing program such as MicroSoft Word® along with a hard copy of the file. A duplicate set of all copy submitted should be kept for reference. Please contact us with any questions you may have. If you have changes to a printed piece we have previously produced, please indicate those changes in red on your sample copy, or digitally on a PDF and submit with the Job Order Form.

FILE CONVERSION ➤

We can convert your file to a digital format or create interactive forms to post on your website. Contact the Print Shop for more information.
PRODUCTION SERVICES ➤

**Copying – Black and White**
The Print Shop has two 110 ppm black and white production copiers with multiple in-line post-production features at competitive prices.

**Copying – Full Color**
Our full color production copier prints 90 ppm. This color solution provides a wide variety of choices in media weights and sizes, finishing capabilities and Pantone® color matching at a price that is unbeatable. Please call for a quote.

**Wide-Format Printing**
We can create oversized prints up to 24” wide x 100” long or smaller in full color or black and white.
We design, print and laminate posters to meet your district’s needs. We can also take your high resolution PDF file and scale to your desired size. Allow extra lead-time for large quantities and if you prints laminated. Cost depends on the saturation of color within the piece. Call the Print Shop for a quote.

**Offset Press**
Our offset press is available for the purpose of printing large quantity runs, carbonless forms, permanent records in 1 and 2 color at inexpensive prices. In general, the greater the quantity, the lower the per piece cost. Low quantities in color may be more cost-effective when run on our full color production copier. Please ask us for more information.

**Envelopes**
The Print Shop has a press exclusively for printing envelopes in 1 or 2-color in a large variety of sizes that are available in stock for fast turnaround.

FINISHING SERVICES ➤

**Jobs that have multiple sheets of paper need instruction for binding unless you need your job unbound (collated or uncollated).**

**Coil Binding**
Is a plastic spiral that coils through many small holes on the side of the paper. The book will easily open back on itself, but is difficult to add pages afterward.

**Saddle-Stitch Binding**
Uses two staples inserted in the fold of the paper. Saddle-stitch bound booklets require a page count in multiples of four as each sheet of paper makes four pages in the booklet. If this is not provided, you may have undesired blank pages in your book.

**Side-Staple Binding**
Combines all the text pages and covers and stitches them together with staples on the left side of the book cover.
**Folding**
Our high-speed production folder can fold your job in many different ways. We fold at a maximum speed of 13,000/hr. for fast turnaround. If you are submitting files, please contact the Print Shop so we can assist in preparing your files correctly for the best result possible.

**Perforating/Numbering**
We can perforate your printed piece so you may use it alone or for tear-out forms included within a booklet. We can crash number your item in red or black ink. File preparation for jobs such as this can be tricky depending on the size of the item. Please call us for assistance if you are preparing the file yourself.

**Laminating**
Laminating is a service the Print Shop offers to the schools to protect and preserve educational materials that are to be retained permanently in the district.

We can laminate 24" wide up to 100' long, but the length depends on a few factors that we can review with you as needed. Items printed on thin or tissue paper, or output on a wax-ink printer can’t be laminated. More time to produce a laminated job may be required.

The Print Shop is not responsible for original items damaged in the laminating process. All original materials are laminated at the risk of the owner.
Printers use terminology that can be confusing, so this guide may help you understand what on earth we’re talking about...

AGAINST the GRAIN - Folding or feeding paper at right angles to the grain direction of the paper.

ART - All illustration copy used in preparing a job for printing.

BLACK AND WHITE - Originals or reproductions in single color, as distinguished from multi-color.

BLEED - A bleed occurs when your design requires the ink to print to the very edge of the paper.

CAMERA READY - This is art on board or paper output that can be photographed. If there is more than one color, they should be separated to different boards or sheets. A composite of your separations should also be included as a guide for stripping of the film for press. Photographs should not be included within the camera-ready art, but photographed as “half tones” in a separate process.

CAPS AND SMALL CAPS - Two sizes of capital letters made in one size of type, commonly used in most roman type faces.

COLLATE - In binding, the gathering of sheets or signatures.

COLOR SEPARATION - In the printing process, the ability to produce files or film converted from the RGB or Lab color space, which most digital cameras and scanners produce, to 4 color (Cyan, Magenta, Yellow Black) commonly known as CMYK, which are the primary printing colors.

COPY - A furnished material (typewritten manuscript, pictures, artwork, etc) to be used in the production of printing.

COVERAGE % - The amount of ink on the page. Always let us know if there are large solid areas of 100% ink on a job and the overall ink coverage. It better allows us to place your job on the appropriate equipment and in some cases adjust the cost of the job.

COVER INK - The cover portion, if different from the text.

COVER STOCK - This is the paper you require for the outside 4 pages of your periodical, providing that it is different from the text.

CROP - To eliminate portions of the copy, usually on a photograph or plate, indicated on the original by “crop marks.”

DUMMY / MOCK UP - A preliminary layout depicting the position of illustrations and text as they are to appear in the final reproduction. A set of blank pages made up in advance to show the size, shape, form and general style of a piece of printing.

flush left (or right) - In composition, type set to line up at the left (or right).

FOLD TYPE - The type of fold you require in order to finish your piece. A letter fold is a paper folded in thirds with each end folding towards the center. A “Z” fold differs in that one third of the sheet folds to the front and the other to the rear and so on.

FONT - In composition, a complete assortment of letters, numbers, punctuation marks, etc. of a given size and design.

FORMAT - The size, style, type page, margins, printing requirements, etc., of a printed piece.

GENERATION - Each succeeding stage in reproduction from the original copy.

GRIPPER EDGE - The leading edge of paper as it passes through a printing press.

GUTTER - The blank space or inner margin, from printing area to binding.

HALFTONE - The reproduction of continuous-tone artwork, such as a photograph, that recreates your image as a series of dots required in printing.

HARD COPY - The permanent visual record of the output of a computer or printer. Also, the material sent to a typesetter in typeset form, for conversion into typeset material.

HOLE PUNCH - Punching or die scoring holes in the piece to allow for binder or other use.

INSERT - A printed piece prepared for insertion into a publication or another printed piece.

LAYOUT - The drawing or sketch of a proposed printed piece.

MECHANICAL - A term for a camera-ready paste up of artwork. It includes type, photos, line art, etc., all on one piece of art board.

NEGATIVE - In photography, film containing an image in which the values of the original are reversed so that the dark areas appear light and vice versa.

NUMBER OF PAGES - How many pages does your book printing or brochure printing have? This is different from how many sheets of paper. For an “apples to apples” and easy to quote them it is best to always deal in page count and not sheet count for a given item.

OPACITY - That property of paper which minimizes the “show through” of printing from the back side or the next sheet.

OUTPUT FILM - To rip your digital files or art as final film.

OUTPUT READY DISK - A disk that is complete and does not require any further production other then to “rip” (the conversion from digital to analog) to film. This disk should also contain a folder for all of your images and another for your fonts used.

PRINT QUALITY - In paper, the properties of the paper that affect its appearance and the quality of reproduction.

REAM - Five hundred sheets of paper.

PERFORATE / SCORE - To perforate or die score in holes that allow one to cleanly remove a coupon or page from the piece with ease and not destroy the piece. If the perforation goes from top to bottom, that is a vertical perforation. If from side to side, it is a horizontal perforation.

SADDLE STITCH - Two staples added to the center of the piece on the fold line, with the head of the staple on the outside of the folded piece.

SET TYPE - To chose the appropriate font (typeface) and type your copy and laying it out on the page.

SPREAD / FLAT SIZE - This is the flat and trimmed size of your printed piece before folding. (Example - an 8 1/2 x 11” 4 page brochure spread out as a 2 page “spread” would be 17 x 11”) NOTE - in printing the width is always the first dimension given.

STRIPPING - The positioning of negatives on a flat prior to platemaking.

TEXT INK - The ink you require for the inside of your piece. This is described by the number of inks you require and the two numbers used are separated by a slash sign / . If the front of your piece has 2 colors and the back has 1, then your piece would be described as 2/1 or “two over one”. There are 2 main kinds of inks, CMYK (cyan, magenta, yellow and black) for process printing, and Pantone® inks also known as spot color. PMS stands for Pantone Matching System®. This is a universal system used in the printing industry to pick the same color every time.

TEXT STOCK - The paper you require for the inside of your periodical. If there were not a separate cover, then would be the stock for the entire piece (i.e. A “self cover”)
Dutchess BOCES Print Shop
